Instructions

A) In the following chart, list all the electrical appliances that your class was able to identify.

B) At home, study your house and put a number value (e.g. 0 waffle makers, 8 lamps...) under the YOU column to show how many of each appliance you can find in your house.

C) When you're finished studying your house, go through the list with a parent or grandparent or other adult and check off the electrical appliances that they had when they were your age under the ADULT column.
