Natural Resource Riddle

#1

I am big and round and very bright

You will see me by day but never at night

A panel collects the energy from me

I am a renewable resource with lots of energy.

ELEMENTARY

Natural Resource Riddle

#2

I am the energy found in moving air
The faster I blow the more I mess up your hair
In Southern Alberta you may feel me
As I turn turbines and make electricity.

Natural Resource Riddle

#3

Drip, drop, from streams and rivers I flow
I'm the largest source of renewable energy you know
You need to drink me to stay alive
But did you know about all the power I provide?

ELEMENTARY

Natural Resource Riddle

#4

I am organic waste and a source of fuel
I can be burned for energy, isn't that cool?
The heat that's made can create electricity
Making use of the waste from farms and trees.

ELEMENTARY

Natural Resource Riddle

#5

I am a mineral mined from the land
I produce lots of energy, isn't that grand!
The waste I leave behind doesn't go away
But the air stays clean so I'm here to stay.

Natural Resource Riddle

#6

I'm thick and black and under the ground

North and East of Edmonton is where I'm found

I'm all mixed in with the sand, water and clay

Did you know that you use my products every day?

ELEMENTARY

Natural Resource Riddle

#7

Found deep in the rock, I am a clear gas
Formed from plants and animals from long in the past
I am more efficient than coal in making electricity
Though pollution is still made when burning me.

ELEMENTARY

Natural Resource Riddle

#8

I am mined from the ground, from near to far
I was once used to fuel trains but never your car
I am easy to find and can make electricity and steel
But the pollution I make is a problem that's real.

Natural Resource Riddle

#9

I come from the earth, deep below your feet
I can be used to make electricity or
fill your house with heat
Under hot springs I can often be found
To use me drill wells deep into the ground.
