

WETLAND FOOD WEB

PRODUCER

Producers are plants.
Producers get their energy from the sun through photosynthesis.

CONSUMERS

Consumers are usually animals.
Consumers eat producers and they eat each other.

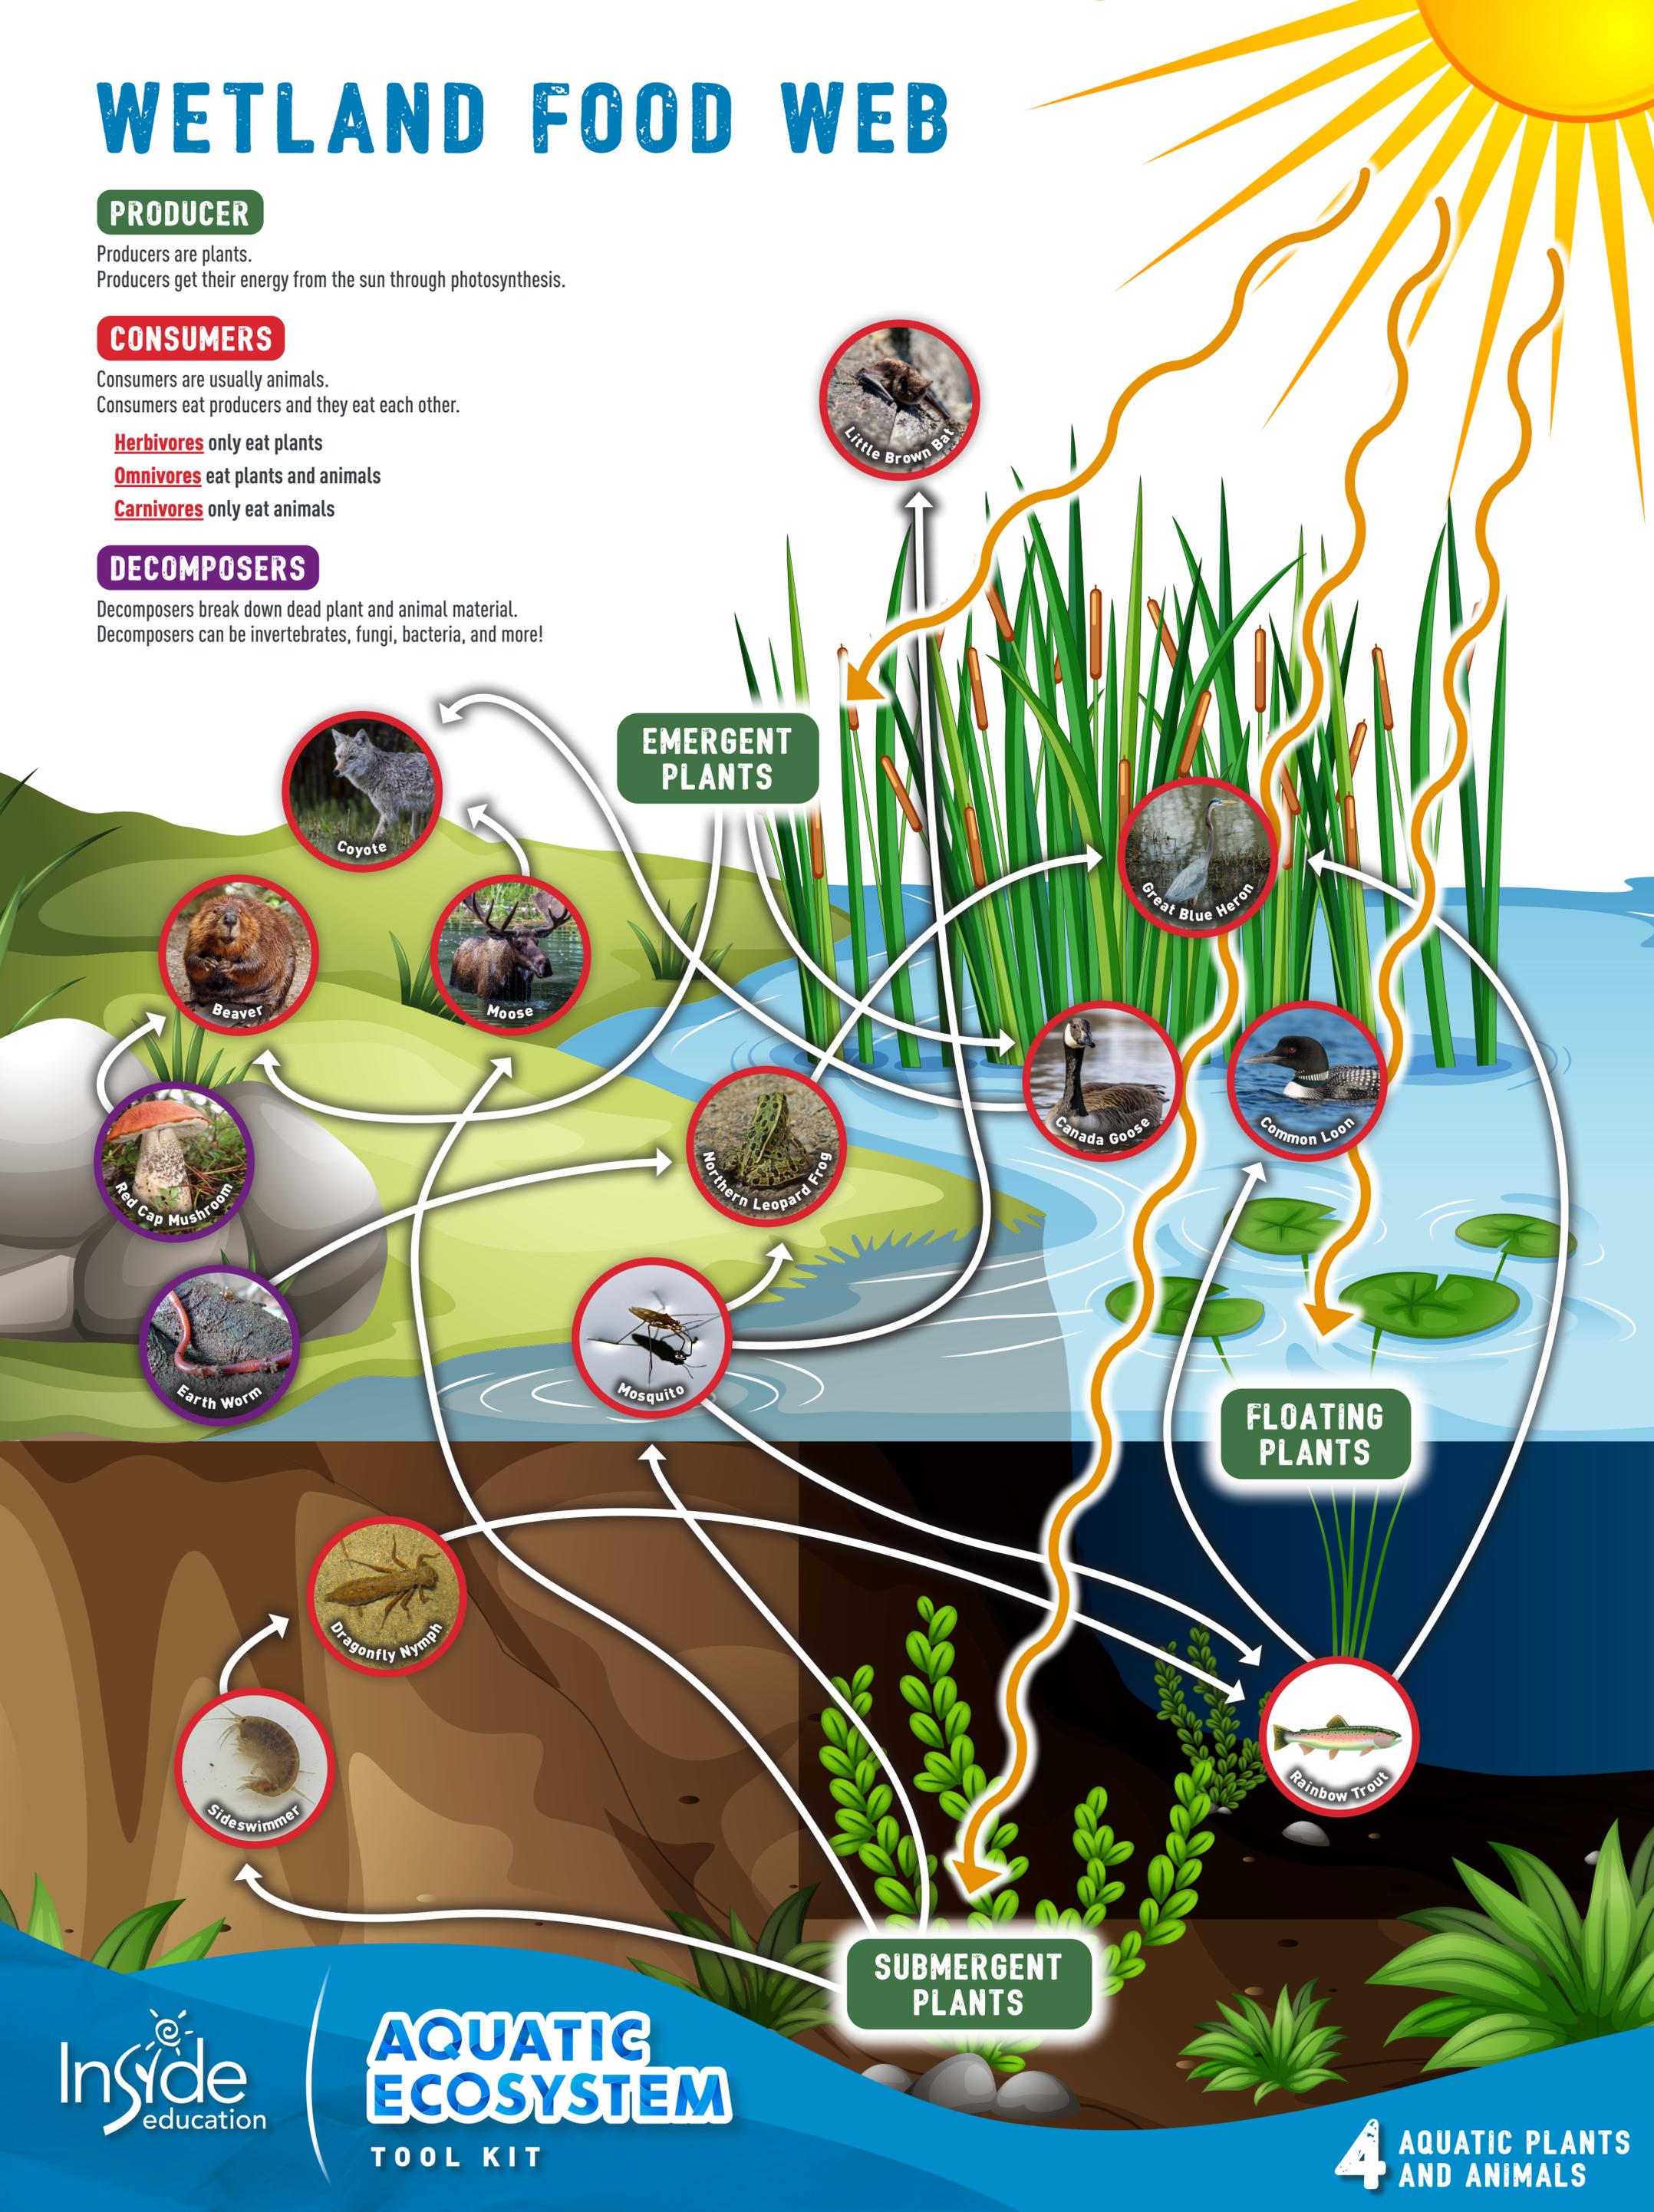

Herbivores only eat plants

Omnivores eat plants and animals

Carnivores only eat animals

DECOMPOSERS

Decomposers break down dead plant and animal material.
Decomposers can be invertebrates, fungi, bacteria, and more!

EMERGENT PLANTS

FLOATING PLANTS

SUBMERGENT PLANTS
